

SECURING DIGITAL EDUCATION FROM

CYBER THREATS

Phishing attacks are a significant security concern, targeting educational institutions with fake emails and malicious links. Current solutions lack specificity for the education domain, leaving students, faculty, and staff vulnerable.

PHISHING ATTACK DETECTION AND PREVENTION TOOL

OBJECTIVES

- Real-time phishing detection through customized algorithms.
- Reducing human error with automated alerts.
- Educating users with integrated awareness modules.

FEATURES:

- Detection Techniques: Rule-based filters, domain verification, keyword scanning.
- Prevention Measures: Suspicious email flagging, URL blocking, multi-factor authentication.
- User-Friendly Design: Dashboard integration with Learning Management Systems (LMS).

ED-PHISHER

DIGITAL SOLUTIONS

“Protecting the Future of Learning , One Click at a Time.”

SECURING EDUCATION THROUGH INNOVATION

Team Members:

- Shawar Ahmed
- Syed Hussain Abid

Supervisor: Sir Hummayun Raza

BENEFITS OF THE TOOL

Reduces the risk of cyberattacks in educational environments.

saves time and resources by automating phishing detection.

Protects sensitive institutional data.

Our mission

"To empower educational institutions with a robust phishing detection and prevention tool that ensures secure communication, protects sensitive data, and fosters a cyber-aware academic community."
